FULL STACK WEB DEVELOPER

I'm a passionate junior full-stack web developer skilled in JavaScript, HTML, CSS, React, Tailwind, Node.js, Express, and MongoDB and also Java(SpringBoot). I enjoy building responsive, user-friendly applications and have worked on several projects that solve real-world problems. I'm eager to keep learning and contribute to impactful projects as part of a forward-thinking development team.

EDUCATION

2023/24-present

Addis Ababa University

Bachelor in Information System

SKILLS

- Frontend developer(React and Tailwind)
- Backend engineering(Mostly node and ExpressJs)
- RESTful Apis and Databases(Mongodb and MySQL)
- Telegram bot development

WORK EXPERIENCE

Frontnend intern

Codsoft, for 1 month

I build some projects for these company and gain real world working experience and also I learn to meet deadline, I got a good review from them. projects **DevElevate** and **Spacecast**

Backend Mentor

GDG(Google Developers Group) AAU, 2025 - present

I work as a part time nodeJs instructor at GDG which is a great community that helps many student to get started with coding and programming as general. It helped me to understand backend technologies even better.

Founder of Maya tutorials

Maya tutorial students tutorial platfrm, 2023/24 - present

Noticing a lack of accessible study resources at university, I developed a mobile app that offers past exam questions with concise explanations. The app addresses a real student need and has the potential to scale as an educational tool.
