📍 Addis Ababa, Ethiopia

---

## ABOUT ME

Full-Stack Engineer with 3 years of experience building scalable applications. Backend-leaning specialist proficient in Node.js (NestJS, Fastify) and Bun, with frontend skills in React/Next.js. Track record of designing APIs, managing CI/CD pipelines, and shipping reliable, end-to-end features.

---

## EDUCATION

Addis Ababa University | Sep, 2022 - Jan, 2026

### Bachelor of Science in Information Systems

ALX Africa | Jan, 2024 - May, 2024

### Software Engineer

Fronend Masters | Jan, 2025 - August, 2025

### Software Design and Engineering

---

## WORK EXPERIENCE

Eaglepoint AI | May, 2025 - March, 2026

### Full Stack Engineer

- Trained ByteDance Seed LLM by authoring high-quality coding solutions, step-by-step technical explanations, and edge-case documentation.
- Built automated test suites to validate solution correctness, robustness, and constraint handling.
- Produced structured SFT/RL training data to enhance model reliability on complex programming tasks.

Certa | Jan, 2025 - May, 2026

### AI & Backend Engineer

- Architected an AI-integrated LMS assistant leveraging advanced backend infrastructure for real-time, context-aware query resolution.
- Designed scalable APIs and optimized databases to handle concurrent interactions securely and seamlessly.

Freelance | Upwork | 2023 - Present

### AI & Backend Engineer

- Dental Clinic Automation & Scheduling System
  - Engineered a custom dental ERP and pipeline that automates client appointments by syncing real-time Google Calendar schedules into Google Sheets.
  - Programmed an automated system utilizing backend APIs to instantly trigger confirmation and follow-up messages to clients.
- Automated AI Video Production Platform (n8n)
  - Built an n8n video pipeline to programmatically extract high-engagement, short-form clips from long-form content.
  - Integrated dynamic subtitle generation and configured automated workflows to auto-post finalized media across social networks.
- Legal CRM Integration & Marketing Engine
  - Architected a legal-tech engine for OpenClaw, integrating MCP with GoHighLevel for advanced marketing automation and CRM.
  - Developed lead generation pipelines enabling agents to deploy multi-channel campaigns and capture data within a unified architecture.

Brana Technologies | Sep, 2024 - Feb, 2025

### Backend Engineer

- Built scalable NestJS APIs for the Sabisa social media platform, delivering core backend features and product workflows.
- Refactored legacy Express codebase to TypeScript, reducing bugs by 35% and improving system performance by 10% via type safety.

Ababa University | Sep, 2026 - Feb, 2026

### Backend Engineer

- Full-Stack Engineer specializing in Node.js (NestJS/Bun) and React/Next.js to build scalable, production-ready web applications and APIs.
- AI & Data Specialist experienced in training LLMs (ByteDance Seed) via SFT/RL data and building high-volume local-language collection platforms.
- Automation Architect proficient in n8n and CI/CD, delivering AI-driven LMS assistants, legal-tech engines, and automated video pipelines.

---

## SKILLS

- |                                    |                                    |                         |
|------------------------------------|------------------------------------|-------------------------|
| • API & Distributed Systems Design | • React & Next.js                  | • CI/CD & Automation    |
| • Database Architecture            | • State Management & Data Fetching | • Containerization      |
| • Performance Tuning               | • TypeScript Core & Ecosystem      | • Cloud Services & IaaS |
- 

## CERTIFICATIONS

### Node.js Instructor & Mentor | Google Developers Group (GDG) AAU

- Taught core programming and backend principles to students entering the tech industry, mentoring them on system architecture and modern web development workflows.
